## ATEX/IECEX APPROVED LOW DIFFERENTIAL PRESSURE SWITCH

The 1800 in Flameproof ATEX/IECEx Enclosure

AT-101NA-1800, shown with VS0 port/valve configuration

Essential for industrial environments, the Series AT-1800 ATEX/IECEx Approved Low Differential Pressure Switch combines small size with 2% repeatability. Set point adjustment inside the switch allows for set point settings across 9 ranges from the low of .07 in w.c. to a maximum 85 in w.c. differential pressure. Series AT-1800 flameproof enclosures are available in aluminum and are ideal for low pressure hazardous area applications. Various housing options such as an overpressure relief valve or external set point adjustment knob are available. External set point knob allows adjustment without opening the enclosure.

## BENEFITS/FEATURES

- Compact size and repeatability provides a high-value switch for many industrial applications
- External set point knob provides easy access that simplifies making adjustments without opening enclosure
- Flameproof enclosure protects the device in hazardous areas
- · Increased response time at low pressures with LD port configuration

## **APPLICATIONS**

- · Hazardous area pressure switch
- · Process applications
- · Mechanical equipment control

**Attention:** Check local safety rules and warnings on unit and manual for a correct use of the instrument in hazardous area.
