

Rapidrop® Flexible Sprinkler Connection

(For Wet Pipe Sprinkler Systems)

Description

The unique Rapidrop® system easily positions the sprinkler in the centre of the ceiling tile at the correct height and can be installed in 10 to 15 minutes. The concept is very simple and breathtakingly efficient.

Rapidrop® is a complete unit, a corrugated stainless steel flexible with nipple, reducer, bar and brackets, which are fitted to the ceiling tile support rails to locate and secure the sprinkler in the correct position. As well as considerably reduced installation time, the risk of mess (from the cutting and threading activity associated with the traditional armoover method) in the clean area below the suspended ceiling is eliminated, allowing other activities to proceed more efficiently.

UL Listed / LPCB Approved

Pressure Rating

Max. Service Pressure:

LPCB 16 Bar

UL 12 Bar

Inlet

R1 or R1.1/4 or 1" NPT

Outlet

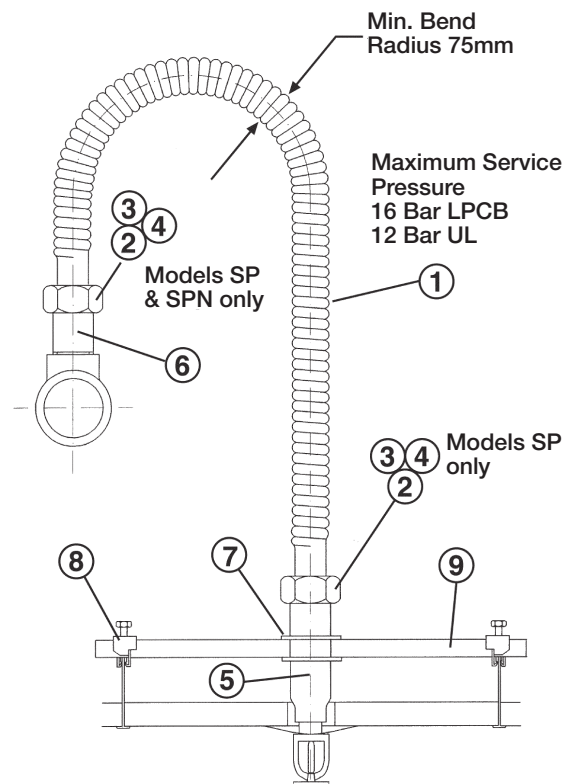

A = Rc1/2 or 1/2" NPT

B = Rc3/4 or 3/4" NPT

C = R1 (External Thread)

Benefits

- Save Time
- No Cutting
- No Welding
- Save Labour
- No Threading
- No Mess - Clean
- Save Money
- No Oil
- Ideal for Retrofit Applications
- No Measuring
- No Grease
- Easy to move for layout changes
