CATALOGO Valvole pinch a manicotto

Rubberlinings / hose inserts part 3 for Hose Diaphragm Valves

- with handwheel – type sheet 100.101 -
- with pneumatic actuators – type sheets 1200.1201 and 1200
- with electric actuators – type sheets 1200.1203, 1200.1204 ;
- for hose pinch float valves – type sheet 500.501
- for hose pinch float safety valves – type sheet 800.801

available in varying materials and qualities:

| | |
|---|-----------------|
| natural rubber NR 5153 black | / max. + 80° C |
| - standard – also abrasion resistant – | |
| natural rubber NR 526black3 | / max. + 90° C |
| Naturkautschuk lebensmittelbeständig NR 5055 hell – auch nach FDA | / max. + 70° C |
| Perbunan NBR 5960 | / max. + 70° C |
| Neoprene CR 4860 | / max. + 70° C |
| EPDM 5562 | / max. + 90° C |
| Hypalon CSM 5664 | / max. + 70° C |
| Butyl IIR 5560 | / max. + 70° C |
| Naturkautschuk mit PTFE-Folie | / max. + 90° C. |

Temperature data refer to water.

We like to offer special qualities on demand.

The resistance of the materials above is depending on the concentration and temperature as well as on the operation pressure of the process media.

Threaded parts vulcanized into rubberlinings building the bolt connections to the control spindle of the armature on one side and on the other to the valve body.

With it a controlled operation is made so that the rubber linings - also with sticky media and media tending to incrustation - always open faultlessly.

By the squeezing operation unwanted deposits will be detached and flowing off.

These high class lining parts are mould parts which are produced in steel moulds due to decades of experience. Fabric linings in polyamide fabric are integrated onesided on the upper side to reinforce the rubber lining and are vulcanized.

The close cooperation with our rubber laboratory and available resistiveness lists aim to determine the most resistive rubber composite and quality for specific needs and case of operation.

The rubber lining is only in contact with the process medium.

After the replacement of this spare part, to which there is a mounting instruction available - see product selection "technical Documentation" - our customers have again a armature as good as new.

dimensions in mm

1) appr. control space volume in litres (l) with valve being closed

Range of application:

powdery products and abrasive media (like e.g. cement, lime, gypsum etc.), granulates, sand, loam, clay, pastes, ore-sludge and coal-silt, solids-bearing fluids, sludges, waste water, feeding-stuff, syrup, juices, mash, air, water, aggressive media, pneumatic conveyor systems.

Construction:

directly actuated, with changeable hose insert with cylindrical and smooth passage, body in GG25 with polyester powder coating.

Materials:

see table (other materials on demand).

Operating pressure:

max. 6 bar

Control pressure:

appr. 2,0 bar superior to operating pressure; control pressure max. 8 bar.

Control media:

compressed air, pressure water or neutral gases.

Connection:

internal thread on both sides
ISO 228/DIN259

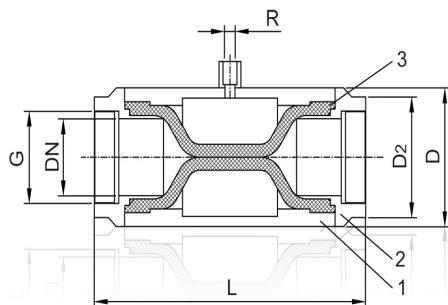

Special constructions:

body in stainless steel,
cone pieces in plastic (PP),
cone pieces in stainless steel 1.4301 or 1.4571,
cone pieces in ceramics / resistant to abrasion,
hose inserts in NBR, CR, FPM, CSM, EPDM,
foodstuff natural rubber NR white;
with 3/2-way-solenoid valves for electr./pneumatic actuating,
with pressure switching and other accessories,
example circuits for pinch valves on demand.
