### DIDE DEVICE INC. MACHINE Rometec srl - www.rometec.it - Rometec srl - www.rometec.it - Rometec srl - www.rometec.i

18mm ID - 60.3mm OD

### INTERNAL CLAMPING

### MANUFACTURER SINCE 1986

### Machine delivered with:

- · 2 standard tool bits of your choice
- Heavy duty plastic box
- · Necessary tools to use with the machine (Allen keys, screws, etc..)
- The complete set of clamping jaws

**TU2 ELECTRIC DIMENSIONS** 

Technical hand book

### COFIM \* types TU2 light portable machine using internal clamping method, auto centered and auto maintained once clamped in the tube and design with a self torque design. The TU2 allows a safe operator work with high production and quality ready for orbital welding assembly compare to traditional methods as grinding or flame cutting.

The TU2 shaft receives internal clamping jaws well marked with the ID size of the tube to ease the operator choice while preparing the machine.

HSS tool bits or carbide bits can work simultaneously to achieve combined beyel (30°+ Facing;  $37^{\circ}5 + Facing; 45^{\circ} + Facing...$ ).

The standard TU2 can be el from 18mm ID up to 60mm OD and with optional shaft can start at 12mm ID.

SAFETY is our priority: The TU2P & TU2E are equipped with 2 actions safe start handle motor for operator use friendly. Machine TII2 Clamping Pange Machining Pange Wall Thickness Stroke

COFIM® types TU3 light portable machine using internal clamping method, auto centered and auto maintained once clamped in the tube and design with a self torque design.

The TU3 can bevel tube and pipe at a high quality ready for orbital welding assembly compare to traditional methods as grinding or flame cutting.

TheTU3 shaft receives internal clamping jaws well marked with the ID size of the tube to ease the operator choice while preparing the machine.

HSS tool bits or carbide bits can work simultaneously to achieve combined bevel (30°+ Facing; 37°5 + Facing; 45° + Facing....).

The TU3 machine is equipped with a tool holder able to bevel from 27mm ID up to 114mm OD and with optional shaft can start at 16mm ID. The TU3 is also equipped with a smaller tool holder of 59mm OD for tight clearance situation.

**SAFETY** is our priority: The TU3 is equipped with 2 actions safe start handle motor for operator use friendly.

# The PBM series is the best solution for a pipe shop looking to improve their production by quantities and qualities.

The OD clamping design leaves all the space in the middle of the pipe to do any inner machining. Because of clamping by means of a self-centering V prism it saves time when used on different pipe sizes. We can supply insert tool holders with inserts which are able to work the pipe in the whole range of the machine without adjusting the cutters.

We can supply various options with the PBM machines such as:

- ID ovolity tracker
- OD cylindrical machining carriage stroke 350mm
- ID counter boring carriage stroke 350mm
- Copying carriage for thick wall and very thick wall up to 100mm.

Machine PBM	Clamping Range	Machining Range	Wall Thickness	Stroke
PBM3	0mm - 76mm	2mm - 114mm	Up to 5 mm	80 mm
PBM4	20mm – 116mm	10mm-116mm	Up to 13mm	100 mm

# **■TU3D ELECTRIC DIMENSIONS**

### **TU3D PNEUMATIC DIMENSIONS**

Beveling Machines COFIM \* types TU2D & TU3D are portable machines using an external gripping method. The TU2D can be el at a very high quality ready for orbital welding.

The TU2D & TU3D receive clamping collet to the OD size of the tube diameter to machine. The clamping collet iaws are well marked to ease the operator choice while preparing the machine. 2 tools can work simultaneously to achieve combined bevel (30°, 37°5, 45, facing). The machine is auto-centering (±0.1mm) and auto maintained once clamped and has a self torque design. The TU2D & TU3D machine can also be equipped with a milling heads to the exact size of your bevel needed then your tube is ready to apply an orbital welding process. The TU2D & TU3D can be supplied with a short clamping head, to prepare fittings.

Machine	Clamping Range	Machining Range	Wall Thickness	Stroke
TU2D	4mm ID - 26mm ID	4mm ID - 26mm OD	5 mm	25 mm
TU3D	4mm ID - 26mm ID	4mm ID - 26mm OD	5 mm	25 mm
Machine U3D	Clamping Range	Machining Range	Wall Thickness	Stroke
TU2D P TU3D P	Pneumatic / 1HP	6Bars (90 PSI)	1000 L/min(35 Cfm)	5,5KG
TU2D E TU3D E	Electric / 1 400Watt	230V/50 hertz	Speed Variator	7,5KG
		115V /50hertz	Speed Variator	7,5KG
		115V /60hertz	Speed Variator	7,5KG
TU2D B TU3D B	Battery	18 V	Charger + 2 Batteries	7,5KG
Options	Short Clamping Head	Milling head		
	TU2D Motor in line	Carbide insert

- 1 collet of your choice
- 2 inserts 4 cutting sides
- Machine box
- Necessary tools to use the machine
- Hand book

#### **FEATURE**

- 1 collar per diameter (carbon or stainless)
- 0-400 rmp 2 speeds
- Chip protection
- 4 sided Carbide Insert
- Chip deflector
- 2 batteries
- 1 charger
- 1 metallic box

### ■ DE3-25 DIMENSIONS

The Tube Facing Machines COFIM® types DE3-25 & DE20-63 & DE3-63 are very light portable machines using an external clamping method.

The DE series allow a safe cold cutting with a high production and high quality giving a tube ready to be orbital welded.

The set of clamping collet are well marked to ease the operator choice while preparing the machine

The turning plate is equipped with 1 facing carbide insert with 4 cutting edges giving a preparation at a very low cost.

The motor of the DE series can be turned 4 times at 90°, giving you more access possibilities when used on site. A bench can be supplied to work in a clamping vice.

Machine DE	Clamping Range	Machining Range	Wall Thickness	Stroke
DE 3/25 DE RA3/25*	3mm OD – 25.4 OD	3mm OD – 25.4mm OD	1mm to 3 mm	20 mm

The Tube Facing Machines COFIM® types TUDC are workbench mounted machines using an external gripping method.

The TUDC series allow a high quality preparation and high production for tube preparation before orbital welding. The clamping collets are well marked to ease the operator choice while preparing the machine. One collet per OD tube size is needed.

The turning plate is equipped with 1 facing carbide insert with 4 cutting edges giving a preparation at a very low cost.

### IN LINE BORING MACHINE

Flange facing machine with outside diameter clamping. Automatic or manuel feed motion.

Selection of: 2 ways feed motion and feed speed.

2 adjustable thrusts, with automatic release.

For all shape of face: flat; raised face; single or double groove; O ring groove; RTJ.

**FF 170**: 0 to 170 mm

**FF 310**: 0 to 310 mm

**FF 610**: 0 to 610 mm

The TU machines can be equipped with flange facing arm as an option. Please consult us.

Portable in line boring and welding machine from diameter 25mm up to 600mm.

EXTERNAL CLAMPING 1/2"-73"

MANUFACTURER SINCE 1986

### Machine delivered with:

- Complete set of clamping jaws
- 1 set of cutting tool bits
- 1 standard beveling tool bit of your choice
- Wooden box
- · All the necessary tools to operate the machine
- Hand book

### **MACHINE ROBUST:**

- Perpendicular cut
- · Able to machine thick wall pipe up to 110 mm
- Cut and bevel simultaneously
- Internal bevel or Internal machining with accessory

### **■TOOL HOLDER:**

- 45 mm stroke
- Star wheel system
- Tool holders available: 70mm Stroke

The COFIM CTO Split Frame machines, is an OD clamping design which can open in half to set on closed line or can be slipped over open end pipe. Their compact design and low radial clearance make the CTO an ideal tool for in-line pipe cutting.

The CTO machines are fast, reliable, and precise. Machining is performed with HSS tool bit or carbide insert as optional.

The CTO machine has a fix body to clamp on the OD of the pipe then an upper rotating ring holding 2 tool holders to cut, to bevel, or to cut & bevel simultaneously the pipe.

The CTO machine uses independent clamping iaw (chuck system) with extension leg sets. 2 starwheel feed tool holder and multi-hanging points to ease the set up.

The CTO can be pneumatic, hydraulic or electric driven 115 V, 220 V and 415 V.

Options such as Single point machining tool holder. Ovolity tracker, counter boring tool holder, Carbide cutting kit, can be used to match the need of specific pipe jobs.
