

## **Beveling machine TU12**

### **Beveling machine TU12 (36")**

#### **General**

The robust and reliable design of the TU12 machines allows their use for every end pipes machining : bevel, internal/external removal and every precis machining. Its fast clamping and work make of it the ideal tool for the pipe fitter, the ironmonger and the assembler.

The pneumatic exhaust is channeled inside the handle and can be rejected further.

#### **Machining**

The clamping of the machine is done by the interior thanks to a centering expansive chuck (with correction of wear).

The operator quickly adjust the tools according to the pipe diameter and the advance by knurled button.

Capacity from 5" to 36".

## **Dati tecnici**

La TU12 è in grado di lavorare tubi con diametro da 130 a 925 mm, L'utensile ha un avanzamento fino a 100 mm, spessore massimo del tubo 24 mm.

La torretta può montare due utensili

Utensili a cianfrinare, attestare , a cianfrino inverso

In dotazione viene fornita una serie di alette e 2 utensili

Peso 85 Kg alimentazione

Motore elettrico 230 VAV potenza 1800 W

Motorizzazione pneumatica a richiesta
