

Pneumatic Diaphragm Valves

PTFE HP Diaphragm Valves

IPS PTFE HP Diaphragm Valve (HPV) is designed for use in high purity water and aggressive chemical applications. Designed with a 100% virgin PTFE wetted flow path, the unit is ideal for DI Water Systems and corrosive media found in solar, semiconductor, pharmaceutical and chemical process applications.

Offered in 2-Way NC, 2-Way NO, and 3-Way port configurations, the all wetted PTFE HPV2 and HPV3 diaphragm valves are an excellent complement to our Mini and Submini pneumatic valve families.

The **IPS HP Valve** design is very compact which makes it ideally suited for tight spaces in process cabinets and panels. Multiple HP units can be rack mounted on a common Polypro Base for ease of installation.
