

## **Pneumatic Drain Valve**

The IPS Drain Valve (DV) is a large orifice 2-way, 3-way and 4-way drain valve capable of handling large volumes of corrosive fluids via an all non-metallic wetted surface. The valve body components are fabricated from PVC, Polypropylene or PVDF. O-Rings sealing options are EPDM, Viton or Kalrez O-rings. The IPS Drain Valve can operate either as air-to-open, air-to-close or air actuated both directions.
