

HS218 RTD Calibrator

- ◆ Accuracy: 0.05%F.S
- ◆ Weight : 0.35kg
- ◆ Dimensions: 185mm×93mm×47mm

Products Description

HS218 RTD Calibrator is a kind of calibrating RTD temperature transmitter instrument, it can use on site. It can measure and simulate various type RTD. It can also simulate and test resistance

Features

- ◆ Measure output temperature of thermal resistance
- ◆ May simulate output of thermal resistance
- ◆ Automatic identification of three-wire or four-wire connection mode
- ◆ Perfect performance on waterproof protection: IP67 grade
- ◆ In case of connecting 220V with automatic over voltage protection function.
- ◆ With manual stepping, automatic stepping and 0 ~ 100% output of phase step and ramp function
- ◆ LED with white backlight
