

# PD Gear Flow Meters Series ALGPD

#### **J** GENERAL

#### **ALPD Positive Displacement GEAR Flow Meters**

The SMC series ALGPD Gear flow meter is suitable for the precise flow measurement of various fluids of viscosities from 5 up to 25k mm²/s. Providing sufficient lubricity of the fluid, the small gear flow meters type ALGPD 01/1 and 02 as well as ball bearing versions may also be used for fluids below 5 mm²/s. Gear flow meters are positive displacement meters, similar in design to a gear pump. The measuring medium rotates two gears, which are engaged with minimum play. The medium is forced along through closed measuring chambers between gears and housing. The gears, which run idle, lose no power. The RPM of the gears is in proportion with the instantaneous flow rate and precisely detected by integral pickups through the body of the meter without contacting the fluid. Flow signal can be displayed using our ALVTM or our various other electronics. We calibrate our flow meters to match the customer's operating viscosities to determine their Kfactors.

### **ALVTM Display with Frequency and Analog Output**

The ALVTM is a programmable local display with integral carrier frequency pickup and amplifier for SMC mechanical flow meter. Flow rate is indicated in an 8 digit LCD display with 14 segments. A 10 point linearization is included to optimize the accuracy. The pulse output provides a flow proportional frequency signal or scaled volume pulse in accordance with programming. For electrical connection a 6-pin plug or a junction box with 6 internal terminals is provided

## **FEATURES**

- ☐ High output frequencies resulting in good resolution and suitable for pulsating flows.
- Reverse-flow detection and pulse multiplication functions
- Ex-protection EExialICT6/T4
- ☐ Resistance to high voltage from 50 kV up to 120 kV
- Special meters with high-pressure connectors up to 690 bar.
- Heated versions are available on request.

#### **7 SPECIFICATION**

#### Gear Flowmeters ALGPD - series

- Connections: Female for, Ermeto-fittings GE 6-PSM, GE 14-PSM or GE 25-PSM, bores for SAE flanges 1¼
- Operating pressure : small size up to 690 bar,larger to 400 bar
- Process temperature : +180 °C
- Flow rates: 0.005 to 1000 LPM
- Viscosities: 5 up to 25,000 mm²/s.
- Material :

Housing: SS per DIN 1.4305/AISI 303 or 1.4571/AISI 316 Ti Gears: SS as per DIN 1.4122/AISI 303 or 1.4460/AISI 329 Shafts, bearing bushes, tungsten carbide, ball bearings

Seals: O-rings: viton, teflon, NBR or EPDM (for brake fluid)

- Linearity: ±0.5% of value @ 1:20 for viscosity 15 -50 mm²/s.
   ±0.25% of value for viscosities 50 to 25,000 mm²/s.
- Weight: 400 to 4000 g

### **ALVTE Carrier Frequency Pulse Amplifier**

- Supply Voltage UB: +8.5 up to 29 VDC, controlled. (incl. reverse-battery protection)
- Quiescent current : < 5 mA</p>
- Frequency range: 2 up to 4,000 Hz
- Process temperature: 120 °C with a distance of at least 25 mm between flow meter and electronic housing 150 C at least 65 mm

### SMC LLC.

2960 Polk St. Suite 12, San Francisco, CA 94109 USA TEL: +1-800-434-9716 FAX: +1-415-673-4416

- LCD display: 8 digits (14 segments), digit height 7mm for real-time value, totals and programmable
- Linearization : with 10 points
- Process temperature: 40 to + 120 ℃ with a distance of at least 25 mm between flow meter and electronic housing
- Ambient temperature : -40 up to +70 °C
- Weight : 700 g
- Frequency output/divider :

3-wire, 8-30 VDC controlled, Ex-versions: 12-30 VDC, < 25 mA, signal output,push/pull,lmax:20mA,frequency output,fmax:3,000Hz, duty cycle: approx.1:1, 2.divider, pulse width: 1 ms, 20 ms, 50 ms, fmax: 500 Hz

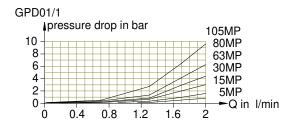

- Analog output : 2-wire (4-20mA)
- Supply voltage: 14-30VDC controlled,UB=(Rload x 20 mA)+ 14V
- Load : < 800 ohms</p>
- Time constant : < 0.2-3 s (programmable)</li>
- Resolution: 1
- Housing: IP 65, aluminum AlMgSiPb, blue anodised
- Ex-protection : II 2 G EEx ia IIC T4, BVS 03 ATEX E 205

# \*\* Please contact your local SMC application engineer

You also need to provide the following information:

Type of liquid	We need the name of your liquid, including operating density and viscosity
Full Scale Flow	Note the flow ranges below
Line Size	we need to know your pipe size as well connection type (flange, threaded, etc)
Process Pressure and Temperature	Please note our P and T limits
Density and Viscosity	You can subsitude Specific Gravity (SG) for density
Type of Electronics	Indicate if you want integral, remote panel or remote wall mounted
Power Requirements	Specify your power requirements such as 24 VDC or 115 VAC or 230 VAC
