Gas Pressure Test Kit

Convenient Kit Perfect For Testing LP and Natural Gas Controls

The **Series LPTK Gas Pressure Test Kit** is ideal for testing LP & natural gas lines and controls. The kit's gage shows if proper pressure is present or if a leak exists. The Series LPTK Gas Pressure Test Kit is available in two different gage ranges, and each gage is 3% full scale accurate with an easy to use calibration screw on the back of the gage. It is easier to use than a manometer, and includes a sturdy case for added durability and safe handling.

Model	Range
LPTK-01	0 to 15" w.c. & 0 to 8.6 oz/in ²
LPTK-02	0 to 32" w.c. & 0 to 18.5 oz/in ²
LPTK-03	0 to 4 kPa & 0 to 40 mbar
LPTK-04	0 to 8 kPa & 0 to 80 mbar

*Consult factory for other range options.

SPECIFICATIONS

- Service:** Compatible gases.
- Wetted Materials:** Gage: brass, hose: rubber.
- Housing Materials:** Steel with black finish.
- Lens:** Polycarbonate.
- Accuracy:** ±3% full scale.
- Pressure Limit:** 110% of range.
- Temperature Limits:** -40 to 150°F (-40 to 65°C).
- Size:** 2-1/2" (63 mm).
- Process Connections:** 1/8" NPT, brass hose barb.
- Case:** ABS plastic.
- Hose:** Rubber, 36" (91.4 cm).
- Tube Nipple:** Rubber.
- Weight:** 1.75 lb (0.8 kg).
